Mayne Inc. Supports Family Camp for Children with Medical Needs

VANCOUVER, B.C., May 4, 2021 –Zajac Ranch for Children is pleased to announce Mayne Inc’s support of summer camp for children with medical conditions and disabilities. The \$25,000 donation will subsidize two weekends of Family Camp, August 6-8 and 20-22 at Zajac Ranch for Children in Mission, B.C.

“We are extremely grateful for the continued support of Mayne Inc.,” says Carmen Zajac, president of Zajac Ranch for Children. “Zajac Ranch is a place of hope and acceptance for our campers. We’re excited to have found a way to invite them back and welcome their immediate family.”

Last summer saw a change in operations for many businesses and non-profits amongst the COVID-19 pandemic. Family Camps were designed to give campers and their families the opportunity to safely enjoy everything camp has to offer while remaining physically distanced from anyone who is not in their household. Going into the second year of specifically designed COVID-19 safe camps with returning staff, Zajac Ranch has taken all necessary precautions. Separate activity areas and sleeping lodges make it possible to run family camps for multiple families at a time without two families ever being in close proximity.

“Mayne Inc. is proud to support local organizations like Zajac Ranch and enable them to continue providing memorable experiences for their campers and families! We truly believe that these camps develop life-long skills, and provide an important recreational outlet for children of all ability levels.”

About Zajac Ranch for Children

Zajac Ranch for Children is a fully accessible and inclusive summer camp that welcomes children and young adults with medical conditions and disabilities. Since welcoming its first campers in 2004, over 6,500 children have benefited from a camp experience that recognizes and appreciates the unique challenges they face. Through specialized programming, accessible facilities, and a 24 hour on-site Medical Centre, our caring and compassionate team work together to ensure that even children with the most complex medical conditions are able to participate in camp activities, while also receiving expert medical care.
